Cotton Varieties Planted, United States
1995 Crop

Deltapine owned varieties were the most popular upland cotton planted in the United States for the 1995-96 season, according to the Cotton Division, Agricultural Marketing Service, USDA. Stoneville owned varieties were the second most popular followed by Sure-Grow, CPCSD, All-Tex and Hyperformer.

Deltapine owned varieties were the most popular planted in 1995, accounting for 64.4 percent of the United States acreage. These varieties accounted for 68.0 percent of the acreage planted in the southeastern states (Alabama, Florida, Georgia, North Carolina, South Carolina and Virginia). They accounted for 56.8 percent of the acreage planted in the south central states (Arkansas, Louisiana, Mississippi, Missouri and Tennessee), 76.6 percent of the acreage planted in the southwestern states (Oklahoma and Texas) and 25.9 percent in the western states (Arizona, California and New Mexico). The most popular Deltapine variety was Deltapine Paymaster HS 26, planted primarily in the southwestern states, which accounted for over 14 percent of the United States acreage planted. The second most popular Deltapine owned variety was Deltapine 50 which accounted for over 10 percent of the U.S. acreage.

Stoneville owned varieties were the second most popular planted in 1995, accounting for 9.4 percent of the United States acreage. These varieties were the second most popular planted in the south central states where they accounted for about 22.1 percent of the acreage and the third most popular in the southwestern states where they accounted for 3.2 percent of the acreage. Stoneville LA887 was the most popular Stoneville variety followed by Stoneville 453. Stoneville LA887 accounted for 3.4 percent of the U.S. acreage and Stoneville 453 accounted for 2.2 percent.

Sure-Grow varieties were the third most popular planted in 1995. These varieties accounted for 6.6 percent of the U.S. acreage and were the second most popular varieties planted in the southeastern states and the third most popular varieties planted in the south central states. Sure-Grow 501 was their most popular variety and accounted for 3.4 percent of the U.S. acreage.

CPCSD (California Planting Cotton Seed Distributors) varieties were the next most popular and accounted for 5.3 percent of the acreage planted in 1995. CPCSD varieties were the most popular planted in the western states. Acala Maxxa was the most popular variety of CPCSD planted and accounted for about 4.9 percent of the U.S. acreage.

All-Tex varieties were the fifth most popular varieties planted and accounted for 3.2 percent of the 1995 acreage. All-Tex was the second most popular planted in the southwestern states. Atlas was the most popular All-Tex variety and accounted for 1.4 percent of the U.S. acreage.

Hyperformer varieties were the sixth most popular planted in 1995, accounting for 1.9 percent of the U.S. acreage. Hyperformer varieties were the third most popular planted in the southeastern states. Hyperformer HS 46 was their most popular variety and accounted for 1.7 percent of the U.S. acreage.

Pima S-7 was the most popular American Pima variety planted in 1995. This variety accounted for 38.5 percent of the United States acreage. Pima S-6 accounted for 28.4 percent, Oro Blanco accounted for 15.0 percent, Germain's CH 252 accounted for 6.7 percent, Pima OA-312 accounted for 6.1 percent and other varieties accounted for the remainder.

Pima S-7 accounted for 53.3 percent of the acreage planted in Arizona, 42.6 percent in California, 30.6 percent in New Mexico and 15.4 percent in Texas. Pima S-6 accounted for 24.4 percent of the acreage planted in Arizona, 68.8 percent in New Mexico, 75.3 percent in Texas and 6.9 percent in California. Oro Blanco accounted for 29.0 percent and Germain's CH 252 accounted for 13.1 percent of the California acreage.

Estimated percentage of upland cotton acreage planted to leading specified varieties, by growth areas, 1995 crop
